16 November 2022

OJ Declaration on Environment and Materials PTH-6202 series, Pressure transmitters

Environmental commitment of OJ Electronics A/S

Green vision

OJ Electronics will continue to develop intelligent solutions, which provide maximum comfort with minimum energy consumption.

Green strategy

For OJ Electronics, sustainability is a business approach that aims to achieve the best possible outcome not just for ourselves, but for our stakeholders and the environment too.

Impact

In all our business decisions and processes, we at OJ Electronics seek to strike a responsible balance between economic, human, and environmental considerations

Products concerned

The data is representative of the PTH-6202 series of pressure transmitters.

Reference product is OJ item no. PTH-6202:

Data are representative of OJ item numbers:

XX-PTH-6202

XX representing customer two-letter abbreviation.

Constituent materials

The products consist of the following fractions:

Fraction	Material	Weight (g) *)	Weight % of total
Cover+box	Plastic, ABS	43	66%
Electronics	PCB	11	17%
	Components	9	14%
Tubes	Silicone rubber	2	3%
	Total	65	100%

*) Weights are approximated, may vary slightly

We declare that to the best of our knowledge the PTH-series meet the requirements of RoHS3, Restriction of Hazardous Substances Directives 2011/65/EU (RoHS2) with amendments, including Directive 2015/863/EU (RoHS3).

We declare that to the best of our knowledge the PTH-series meet the requirements of POP, Regulation (EU) 2019/1021 of the European Parliament and of the Council on persistent organic pollutants with amendments.

We declare that no nano materials have been intentionally added to the product.

In accordance with REACH, Registration, Authorisation and Restriction of Chemicals, European Union Regulation (EC) 1907/2006 with amendments, we hereby declare that the products include the following components with a content of Substances of Very High Concern, SVHC, above the limit of 0,1% referring to the SVHC Candidate List of 10th of June 2022.

Component *)	Component weight (g)	SVHC	CAS-no.	Substance concentration (% w/w)	RoHS Exemption
SM4007PL-TP	0,017953	Lead	7439-92-1	3,2%	7.a
SMBJ6.5CA-E3/5B	0,093	Lead	7439-92-1	7,1%	7.a

*) Where alternative components might be used, "worst case" is reported.

Packaging and accessories

Products in unit boxes are packed in brown cardboard boxes for transportation. Box size for transportation depends on size of order. When packing small orders, it may be necessary to add filler (typically paper or plastic bubble wrap) for stability. Filler is mainly reuse and can be reused.

Packaging	Material	Weight, per unit (g)
Unit box and insert	Cardboard	41
Instruction manual	Paper	19

OJ ELECTRONICS A/S
STENAGER 13 B
DK-6400 SØNDERBORG

F. +45 73 12 13 13
WWW.OJELECTRONICS.COM
OJ@OJELECTRONICS.COM
CVR 10643597

Smaller orders are shipped in brown cardboard boxes. For larger orders, brown cardboard boxes may be stacked on pallets, wrapped or strapped:

Pallet: Euro pallet, heat treated according to ISPM 15
Wrapping foil: Plastic, LLPDE
Strapping: Plastic, PP

Manufacturing

The products are manufactured at OJ Electronics A/S, Sønderborg, Denmark. OJ Electronics has an environmental certification according to ISO 14001:2015.

CO₂-equivalents for manufacturing: 0,124 kg CO₂-eq/product *)

*) Scope 2, 2021, average of all products produced at OJ.

Installation

For the installation of the products, only standard tools are needed.

Use

No consumables are necessary to use these products.

End of life

Development team at OJ Electronics A/S aims to integrate product end-of-life factors in the design phase.

Hazardous Waste

The electronics include components with a content of SVHC above the limit of 0,1% as stated under "Constituent materials". When products are used as intended, the substances pose no risk. Caution is advised when disassembling product and disposing of electronic components as waste.

OJ is in the process of registering products in the SCIP database in accordance with EU Waste Framework Directive (EU) 2018/85. This declaration will be updated as soon as a SCIP registration number is available.

Recycling

Recyclability rate is estimated to 95%.

Products can be separated into following waste fractions:

Fraction	% mass of products
Plastic (ABS)	66%
Electronic card, components	31%
Other	3%

Packaging is 100% reusable (pallet, filler) or recyclable (boxes, inserts, wrapping foil, strappings).

Best regards
OJ ELECTRONICS A/S

Karin Schmidt, QHSE Coordinator
